SOLIDARITY WITH FARMERS

Equal Exchange has built alternative trade supply chains for small-scale farmers around the world for the past 34 years. Through long-term trade partnerships with farmers and with the help of supporters like you and your congregation, we have proven that alternative trade works for farmers, consumers, and the planet we share. And yet, our mission is more threatened today than ever before. Climate change is wreaking havoc on our farmer partners. Corporate consolidation of the food system has reduced the power of farmers and consumers alike. A world-wide pandemic has disrupted supply chains. In order to withstand these mounting pressures, we must redouble our efforts to act in solidarity. Together, we can protect what we have already built and share it with others far and wide.

You are a critical part of this network, please stay in touch with us to explore how we can continue to develop this work together.
